

Cable Bolts

Available in Pre-Cut and Continuous Coils

Patent No. 640906
Patent No. 770595
Test reports available

PRODUCT DESCRIPTION

15.2mm seven wire steel strand is used, with bulbs being placed at various spacings. The bulbs in the cable allow resins and grouts to penetrate open areas and therefore create radial confinement.

TECHNICAL SPECIFICATIONS

PRODUCT PROPERTIES

15.2mm Low Relaxation Seven Wire Steel Strand
Yield Force at 0.2% (kn)
Tensile Strength (kn)
Mass Per Metre (kg)

Minimum	Typical
212	235
250	270
	1.125

RELEVANT STANDARDS

- Material AS1311 -1987

FEATURES

- Up to 5.7 spacings can be made per metre.
- Can be made in single, twin or triple strand.
- Bulb diameter to suit.
- Complete with swage and fish hook.
- Galvanised.
- Compact.

SUPPLY & PACKAGING

- Continuous coils are supplied strapped, palletised and shrink wrapped.
- Individual lengths up to 5 metres come strapped in bundles of 50.
- Individual lengths 6 metres and over come coiled in bundles of 25.
- Other packing quantities are available on request.
- Cables colour coded for identification.
- Can be debonded on request.

NOTES

- Other diameter material can be bulbed on request.
